

Executive Summary

I am currently an Assistant Professor (Tenure Track) in the Department of Transportation Engineering at Tsinghua University and the Principal Investigator of MoS Lab. I obtained my Transportation Ph.D. degree at MIT in 2022 and my dual Master's degree in Transportation and Computer Science at MIT in 2020. Before joining MIT, I obtained my dual Bachelor's degree in Civil Engineering and Management from Tsinghua University. My research focuses on the resilience of transportation systems with a specific application in public transit (PT), including 1) network performance and passenger behavior monitoring, 2) incident-aware PT control strategy design, and 3) interactions between PT and other transportation modes. My work utilizes various mathematical techniques including optimization (robust/integer/non-linear), probability and statistics, machine learning (deep/reinforcement learning), econometrics, and game theory. I have published **32** peer-reviewed scientific papers (**20** first-authored) in leading transportation journals (TR-A, B, C, E, IEEE ITS, TS, CACIE, EJOR, Nature Sustainability, etc.). My work resulted in significant industrial impact. During my internship at Lyft, I proposed a new vehicle routing algorithm for bike and scooter rebalancing and battery swap, which saves 1.6 operation million costs per year and has been implemented in all cities with Lyft's micro-mobility services. My work at Lyft focuses on real-time driver incentive design. I shipped two iterations of algorithms to over 200 cities and improved 38 million annual profits for the company (validated by A/B test). Before joining Tsinghua, I led the US supply chain algorithm team at TikTok E-Commerce, working on problems such as SKU-level demand forecasting, Sales & Operations Planning (S&OP), replenishment recommendations, stockout alerts, inventory placement and transfer, and truck routing and scheduling. At TikTok Shop, I also designed and delivered the first algorithm-driven free shipping policy from 0 to 1, resulting in 16.7% increase in ROI.

Education

- 2018–2022 **Massachusetts Institute of Technology**, Cambridge, MA
- PhD in Transportation (finish in 4 years)
 - GPA: **5.0/5.0**; Complete 15 registered courses in the fields of transportation, computer science, optimization, probability and statistics, and economics. Obtain 6 A+.
 - Advisors: Jinhua Zhao, Haris N. Koutsopoulos
 - Committee members: Jinhua Zhao, Haris N. Koutsopoulos, Zuo-Jun Max Shen, Cathy Wu
- 2018–2020 **Massachusetts Institute of Technology**, Cambridge, MA
- Master of Science in Transportation
 - Master of Science in Electrical Engineering and Computer Science (EECS)
 - GPA: **5.0/5.0**
 - Advisors: Jinhua Zhao, Haris N. Koutsopoulos, Patrick Jaillet
- 2014–2018 **Tsinghua University**, Beijing, China
- Bachelor of Civil Engineering
 - Bachelor of Management (Dual degree)
 - GPA: **93/100**; Rank: **1/105**
 - Advisor: Ruimin Li
 - *summa cum laude* (top 1%); Tsinghua Presidential Scholarship (a.k.a. Te Jiang); Valedictorian of the School of Civil and Hydraulic Engineering

Work & Research Experience

- Jul 2026 – Present **Department of Transportation Engineering, Tsinghua University**
 Assistant Professor (Tenure Track)
- Principal Investigator of MoS Lab, conducting research and teaching in resilient and intelligent transportation systems, public transit operations, travel demand and behavior modeling, transportation machine learning, and optimization.
- Dec 2023 – Jun 2026 **TikTok E-Commerce, Supply Chain and Logistics Team**
 Staff Machine Learning Engineer / US Supply Chain Algorithm Lead
- Led the US supply chain algorithm team for TikTok Shop, covering algorithms for fulfillment, inventory, warehousing, and middle-mile transportation.
 - Led the design of the first algorithm-driven free shipping policy for the TikTok E-Commerce platform from 0 to 1 based on **causal inference models**, increasing the repurchase of the system by 3.2% while saving 9.2% total subsidy cost and significantly increasing the shipping subsidy ROI.
 - Developed the first warehouse-level demand forecasting model for TikTok Shop from 0 to 1 using **time-series models**, reducing prediction errors from 30% (manual forecasting) to 10%. The model replaced the manual procedure for weekly warehouse labor planning.
 - Received “M+” ratings in two consecutive performance reviews, even when the overall E-Commerce organization was rated “M-”. Awarded 2024 H2 Spot Bonus for exceeding expectation performance (4/100+).

Sep 2022 – **Lyft Inc., Real Time Supply Management Team**

Dec 2023 Research Scientist (Sep 2022 – Oct 2023)

Senior Research Scientist (Oct 2023 – Dec 2023)

- **Science tech lead** for Lyft's most important driver incentive product: Real-time Bonus Map. Design the product's future road map for 2024-2025.
- Develop a **heuristic** algorithm to solve a **nonlinear optimization** model to generate the bonus map for drivers. Commit **27k+ lines of production codes**. The algorithm is run in real time (every 2 minute) with streaming features.
- My work improves Lyft's annual rides by 3.3 million and driver hours by 0.93%, equivalent to **38 million annual profit** (validated by A/B test).
- Got 2 consecutive "Exceeding Expectation" ratings in the performance review, promoted to senior research scientist in a year (the fastest record at Lyft).

May 2022 – **Lyft Inc., Transit Bike Scooter (TBS) Operation Technology Team**

Aug 2022 Research Scientist Intern

- Propose a new initialization algorithm for solving vehicle routing problem in micromobility systems
- Improve the operation efficiency by 4.2%, equivalent to 1.6 million annual cost saving. Implemented the algorithm to production in all Lyft's micro-mobility service markets
- Got intern re-hire offer after the first-half of my intern period because of excellent performance

Aug 2018 – **Urban Mobility Lab and Transit Lab, MIT**

Present Research Assistant

- Conducting research in public transit, demand modeling, optimization, and machine learning.

Jan, Aug **Chicago Transit Authority (CTA)**

2020 Research Intern

- Analyzed the impact of rail disruptions
- Designed passenger path recommendation strategies under rail disruptions

Jul 2019 – **Hong Kong Mass Transit Railway (MTR)**

Aug 2019 Research Intern

- Delivered a network performance model which is capable for system performance monitoring. [\[More\]](#)
- Gave four training seminars to MTR employees about the model application.

Jun – Jul in **Singapore-MIT Alliance for Research and Technology (SMART) Center**

2016 – 2019 Research Intern

- Analyzed people's preference of autonomous vehicles (AV) [\[More\]](#).
- Studied the relationship between built environment of travel mode choice. [\[More\]](#)
- Simulated the interaction between AV and public transit from a competitive perspective. [\[More\]](#)

Dec 2015 **Institute of Transportation Research, Tsinghua University**

–Aug 2018 Research Assistant

- Proposed a vehicle speed profile estimation model. [\[More\]](#)
- Analyzed people's satisfaction of on-street parking. [\[More\]](#)

Projects & Funding Application

2024 – 2027 **Toward a Resilient Transportation System, \$279,600**

Principal Investigator (PI) National Science Foundation for Talented Young Researchers, China

- The project aims to develop a framework to improve the cities' capability of handling unplanned incidents and service disruptions, especially in public transit systems
- The project focuses on monitoring, control and planning tasks that help the city to understand and mitigate incident impact, with methods of machine learning and optimization

2020 – 2021 **Modeling COVID-19 Infection Risks in Commuting, \$90,000**

Lead Researcher: Write proposal; Design research framework MIT QUEST for Intelligence

- The project aims to develop a commuting infection risk evaluation model for MIT community to support the decision-making for the MIT reopen plan during the COVID-19 pandemic
- The project got \$90,000 funding support from MIT QUEST for Intelligence for 1 year

- Rejected **Carbon Token to Increase Transit Ridership and Improve Equity, \$200,000**
Co-Lead Researcher: Write proposal; Design research framework *US Department of Transportation*
- The project aims to design a blockchain-based travel incentive mechanism to encourage people's sustainable travel by using cryptocurrency. The token distribution algorithm we design can guarantee the minimum value of a token (related to the value of reduced carbon emissions). Our future prospective is to establish a blockchain-based carbon credits trading market
 - The proposal was submitted to US DOT Small Business Innovation Research Program

Awards & Honors

- 2025 **Spot Bonus Award for Exceeding Expectation, TikTok Shop**
4/100+ in the global supply chain and logistics algorithm team
- 2024 **Global Urban Rail Transit Best Dissertation Award & Zhongheng Shi Honorary Prize**
First place. Awarded to an outstanding PhD dissertation in urban rail transit
- 2023 **Dan & Eva Roos Thesis Prize, MIT**
Awarded to an outstanding PhD dissertation in transportation and mobility at MIT. Applicants including students from computer science, economy, and operations research
- 2022 **Best PhD Dissertation Award, Chinese Overseas Transportation Association (COTA)**
Awarded to top PhD dissertations in transportation. Presented at the Dissertation Award Ceremony at TRB
- 2021 **Runner Up Award (2nd Place), Amazon Last-Mile Routing Research Challenge**
\$50,000 cash prize shared with my teammates Xiaotong Guo and Qingyi Wang. Featured by [\[Amazon Science\]](#) and [\[MIT News\]](#)
- 2021 **UPS PhD Fellowship, MIT**
Around \$90,000 fellowship covers one-year tuition and stipends. Awarded to a top PhD student conducting research in logistics, transportation, and supply chain. Applicants including students from computer science and operations research. [\[More\]](#)
- 2018 **Best Bachelor Thesis Award, Tsinghua University**
Top 4%
- 2018 **Outstanding Graduate Award, Tsinghua University and Beijing**
Top 2%
- 2017 **Tsinghua Presidential Scholarship (a.k.a. Te Jiang)**
Highest Tsinghua University undergraduate scholarship, 10 out of 3,300+ per year. [\[More\]](#)
- 2017 **Cai Xiong Scholarship, Tsinghua University**
Awarded to students with strong scientific potential, 10 out of 3,300+ per year.
- 2016 **First Place, Structural Design Competition, Tsinghua University**
Along with the Best Loading Capacity Award and Best Structure Calculation Award. Most important competition in Tsinghua Dept. of Civil Engineering
- 2016–2022 **Tang Lixin Scholarship, Tsinghua University**
Awarded to students with outstanding academic performance until they finish the graduate study, ~30 out of 3,300+ per year
- 2015 **10-th “Spark” Innovative Talent Cultivation Program, Tsinghua University**
Academic and scientific research talents training program for top Tsinghua undergraduates, ~40 per year [\[More\]](#)
- 2015–2018 **Tang Zhongying Moral Education Scholarship, Tsinghua University**
Awarded to students with excellent academic performance and enthusiasm for public welfare, ~100 per year
- 2015 **China National Scholarship**
Highest scholarship given by Chinese government, top 0.1%
- 2014 **Outstanding Graduate Award (for High School Students), Beijing**
Top 5%

2014 **Ranked 11th in the National College Entrance Exam, Beijing**
Scores 712/750; Admitted by Tsinghua University, top 0.02%

Invited Talks & Guest Lectures

- Mar 2024 **Toward a Resilient Transportation System: Applications to Public Transit**
Tsinghua University
- Mar 2024 **Toward a Resilient Transportation System: Applications to Public Transit**
Zhejiang University
- June 2023 **Implementation of Algorithms in Shared Mobility Industry**
MIT, JTL Urban Mobility Lab
- May 2023 **Implementation of Algorithms in Shared Mobility Industry**
University of California, Berkeley
- Dec 2022 **Toward a Resilient Transportation System: Applications to Public Transit**
Young Scholars Symposium on Frontiers in Innovative Technology, Shanghai Jiao Tong University
- July 2022 **Individual Path Recommendation Under Public Transit Service Disruptions Considering Behavior Uncertainty and Equity**
C2SMART Center, New York University
- Aug 2021 **Individual Mobility Prediction: An Interpretable Hidden Markov Approach**
Southeast University-Monash University Joint Graduate School
- May 2021 **Toward a Resilient Public Transit System**
International Young Scholars Forum, Tongji University
- Apr 2021 **Toward a Resilient Public Transit System**
Smart Transportation Lab, McGill University
- Jul 2020 **Modeling Epidemic Spreading through Public Transit using Time-Varying Encounter Network**
MIT Center for Real Estate, Virtual Summer Seminar Series
- Jun 2019 **Assignment-based Path Choice Estimation for Metro Systems Using Smart Card Data**
Southeast University-Monash University Joint Graduate School

Academic Service

- Journal Referees Transportation Research Part A • Transportation Research Part B • Transportation Research Part C • Transportation Research Part E • IEEE Transactions on Intelligent Transportation Systems • Transportation • Transport Policy • Journal of Transport Geography • Travel Behavior and Society • Transportmetrica A • Journal of Public Transportation • PLOS One • Journal of Advanced Transportation • Communications in Transportation Research • Data Science for Transportation • Urban Rail Transit • International Journal of Transportation Science and Technology • Computer Modeling in Engineering & Sciences • Journal of Data Analysis and Information Processing
- Conference Referees Transportation Research Board Annual Meeting (TRB) • IEEE Conference on Intelligent Transportation Systems (IEEE ITSC)

Leadership & Community Activities

- Jan. 2021 – **MIT Chinese Student and Scholar Association (CSSA)**
Sep. 2022 Executive Board Member
 - Co-organized 2021 MIT-Harvard online Chinese Lantern festival celebration and 2021 Mid-Autumn festival celebration.
 - Volunteer for healthy bags dispatching
- Jun. 2021 – **MIT Chinese Entrepreneur Organization (CEO)**
Sep. 2022 Treasurer and Executive Team Member
 - Reimbursement and funding management
 - Co-organized “FreesFund” mini-salon activity
 - Co-organized 2021 Fall MIT Asian Career Info Session Series

- Dec. 2016 – **American Society of Civil Engineers International Student Group (ASCE-ISG) of Tsinghua University**
Dec. 2017 President
- Organized 23rd Tsinghua University Structure Design Competition (300+ participants)
 - Organized more than 15 group meetings for around 50 active members
 - Represented Tsinghua at 3rd ASCE-ISG China Regional Annual Meeting
- Dec. 2016 – **Student Association for Science and Technology (SAST) in Dept. of Civil Engineering**
Dec. 2017 President
- Organized 20+ competitions and activities, including Transportation Technology Competition
 - Initiated “Innovative Talent Training Program”, which financially supported undergraduate research projects and summer research training at top international institutions
 - Obtained Outstanding SAST Award in Tsinghua University (< 20%)
- Sep. 2015 – **Class 42 in Dept. of Civil Engineering**
Dec. 2016 Class President
- Organized class parties and other team-building activities
 - Obtained Tsinghua University Excellent Class Award (< 10%)

Computer Skills

Proficient Python, Matlab, R, $\LaTeX$, Julia, AutoCAD
Familiar C, MySQL, HTML, ArcGIS, Weka
Libraries Pandas, NumPy, Tensorflow, Keras, PyTorch, scikit-learn, SciPy, Gurobi, Matplotlib
